Опис

EDUCATION:

- National University “L’viv Polytechnic” 2005-2012 year (Ukraine, L’viv)

Major of study: Master of Science - Civil and Industrial Engineering.

- Specialized school in English №4 1994-2005 year (Ukraine, Stryi)

SKILLS & ENDORSEMENTS:

- Proficient application of 3D CAD design tools (Siemens NX, Catia) and 2D CAD design tools (AutoCAD, ArchiCAD), Expert in Microsoft Office suite
- Languages: Ukrainian– native, Russian – fluent, English – fluent, German – beginner.
- 6+ years of experience in the wiring harness design and development environment or component engineering/management environment
- Trainings: Leadership training – 07/2017, Project Management – 12/2016, Management Decisions – 04/2017, Intercultural Communication - 04/2017, Program to develop Trainers – 12/2015

PROFESSIONAL EXPERIENCE:

Leoni Wiring Systems INC Troy, MI 01.08.2018 – Present

Senior Design Release Engineer/VAVE (C1XX BU GM)

Responsibilities:

Lead engineering activities for VAVE for the coordination of the overall product design:

- 2-D / 3-D Harness / component routing
- Coordinates and participates in technical events internally and externally
- Participate in process development and documentation
- Assure design manufacturability
- Support technical sales and business pursuit activities
- Evaluation of customer systems
- Supports integration of innovation into customer products
- Follows the Value Analysis Value Engineering (VAVE) processes and methods utilizing the tools provided.
- Conducts and supports VAVE workshops and other activities to generate potential VAVE ideas
- Prepares VAVE cost calculation and quotation
- Prepares internal and external communication to support ideas
- Systematically monitors and drives VAVE idea implementation
- Attends trial builds at customer development sites and production locations to support idea validation
- Coordinates drawing implementation of VAVE idea with Design & Development team and CPM support
- Monitors LEONI production plant idea implementation
- Provides technical knowledge and guidance to associate design engineers
- Manages Best Cost Country engineering activities
- Ensures regular communication with customer engineers

Engineering Manager: Junghoon Park - 2487974332

Leoni Wiring Systems Ukraine, Stryi 01.09.2016 – 01.08.2018

Lead Design and Development Engineer (Competence Team BU GM)

Responsibilities:

- Directs the Design & Development (D&D) activities to fulfill internal and external customer requirement
- 1st contact between Engineering and Production (vice versa) in relation to engineering and design issues.
- Ability to solve issues independently, quick, face to face.
- Training of Engineering and customer change management workflow and other process actions in plants.
- Support future shifting activities from Engineering (D&D) to production plants (Best costs vs. high cost).
- Documentation and tracking of production issues in relation to Engineering, with the target to evaluate and improve definition of design for manufacture rules under consideration of given customer specification.
- Support gap closing management in any case of urgent issues.
- Support implementation of new projects (C1XX in Merida, MEXICO)
- Supervise allocated design engineering personnel (C1XX in Merida, MEXICO)
- People Management of the area of responsibility (resource allocation, evaluation, leadership, monitoring) (C1XX in Merida, MEXICO)
- Coordinates activities across departments and monitors results in order to achieve the defined objectives (C1XX in Merida, MEXICO)
- Continuously empowers and motivates the team by showing attention for good performance (C1XX in Merida, MEXICO)

Head of Engineering: Melnyk Oleh - +380676703466

Leoni Wiring Systems Ukraine, Stryi 01.06.2015 – 01.09.2016

Lead Engineer/ Team Leader (D1XX IP/HDLP)

Responsibilities:

- Provide guidance, instruction for the team.
- Involving and supporting plant processes.
- Create and implement technical processes into production (Change management process)
- Creating technical documentation for manufacturing.
- Implementation of new drawing and changes.
- Take a part in continuous improvement, calculate capacities.
- Load data into ERP system FORS (routing plans, times, structures, etc.)
- Assures preventive and corrective actions in case of non-quality performance

Engineering manager: Ruslan Leschyshyn - +380982347213

Leoni Wiring Systems Ukraine, Stryi 04.23.2013 – 06.01.2015

Product Engineer (D1XX IP)

Responsibilities:

- Create and implement technical processes into production (Change management process)
- Creating technical documentation for manufacturing.
- Implementation of new drawing and changes.
- Take a part in continuous improvement, calculate capacities.
- Load data into ERP system FORS (routing plans, times, structures, etc.)
- Assures preventive and corrective actions in case of non-quality performance

Engineering manager: Ruslan Leschyshyn - +380982347213
