Work experience

MasterDynamix trainee QA engineer (2021)

Time tracking system testing. I tested the correctness of filling out tasks, validating fields, and testing the application interface. Performed exploratory testing, used Equivalence partitioning techniques, boundary value analysis. I had administrator rights, created tasks, projects, assigned tasks to users and monitored system behavior (Cause/Effect). Wrote test cases, bug reports, checklist, and reported QA lead in Jira.

Qwasar Silicon Valley platform (2021)

Developed a micro projects in JavaScript, HTML and CSS. Participated team projects in JavaScript.

PortaOne Education Center (2020-2021)

Installing a virtual machine in VirtualBox, working remotely with SSH, file transfer, regexp, working with files, Cisco Packet Tracer, working with a MySQL database (creating databases, tables, filling tables, create user and grant privileges), installing and configuring the web Apace server.

Chernihiv Regional Philharmonic Center (2004-till now)

Maintenance, installation of sound and lighting equipment, sound recording of live events, work as a lighting designer at concerts and filming videos, sound recording of concerts.
