Опис

Hello!

My name is Michael, I'm a Character Artist with 2 years of self education as a hobby. Characters creation became my passion. I don't have employment experience as artist yet, but willing to start as soon as possible. I started from creation some characters in Adobe Fuse and DAZ Studio. Used those models in my game prototypes, but realized that it's not enough for me and I need more freedom in this process. So I've completed Zbrush courses at “ArtStation” school in Kiev. And a few more courses and tutorials to cover all topics by myself.

Now my specialties is the entire pipeline of creation of character models for game or render from concept and sculpting to animation and rendering or use in Unreal Engine.

I am a hard-working and responsible person. I like to be a part of a team to learn something new and raise my skills to higher level.

One of my dreams is to seat with my friends, play a new video game and say: “Look, that is my character over there”.
