Опис

Frontend Developer with over 3 years of development experience, specializing in HTML/CSS, JavaScript, PHP (WordPress), and React. I have extensive experience building web applications that meet high standards of quality, performance, and user experience. I continuously enhance my professional skills, learn new technologies, and stay current with modern trends in web development. I am results-driven and committed to delivering high-quality work. I am seeking a Frontend Developer position at a dynamic, growing company where I can effectively leverage my expertise in web development and analytical tools to contribute to the organization's business objectives.

But just in case, I'll leave my portfolio here: portfolio-website-maximdoc.netlify.app

Frontend Developer IWIS LLC · Part-time (Feb 2023 - Present · 2 yrs 6 mos)
Designed, developed, and maintained websites from scratch, collaborating closely with PMs, designers, and clients to deliver bespoke web solutions.
- Implemented responsive layouts with modular, maintainable code.
- Provided ongoing support and revisions for live sites, ensuring optimal performance and reliability.
- Operated within Agile teams: planning sprints, attending daily stand-ups, and aligning development efforts.
- Engaged directly with clients to clarify requirements, present deliverables, and incorporate feedback.

Front End Web Development Stealth AI Startup · Full-time (Feb 2025 - Jun 2025 · 5 mos)

Executed full-cycle website development and maintenance using Next.js with a MongoDB backend, collaborating closely with designers to enhance site sections, and building data-scraping and automation solutions.
• Configured and optimized MongoDB for high availability and performance, implementing indexing and replica sets.
• Partnered with designers to refine both new and existing website sections, deploying updates seamlessly.
• Built a Puppeteer/Cheerio-based scraper to automate data collection from US government websites.
• Automated internal workflows with n8n integrating APIs, handling webhooks, and sending notifications reducing manual tasks by 70 %.

Frontend Web Developer Outstaffing company · Full-time (Aug 2022 - Jun 2025 · 2 yrs 11 mos)
Executed full-cycle website development translating Figma mockups into production-ready sites and owning ongoing maintenance and revisions.
• Cut development turnaround 40 % by modularizing components with BEM-based CSS Grid and automating builds with Gulp.
• Boosted Lighthouse performance to 90+ on mobile and desktop via optimized assets, responsive markup and efficient Fetch patterns.
• Halved content update time by building ACF-driven WordPress templates and Elementor widgets for dynamic workflows.
• Accelerated feature delivery 35 % through isolated React/Next.js components and Vite-powered dev builds.
• Managed 10+ projects end-to-end, collaborating with PMs, designers and back-end teams to achieve 100 % on-time sprint milestones.
• Drove client satisfaction (95 %+) through direct requirement gathering, demos and iterative feedback loops.

Front End Development OliOil.iO · Full-time (Dec 2024 - Jan 2025 · 2 mos)

Delivered end-to-end WordPress development building secure user systems, API integrations and custom plugins to streamline content delivery and management.
• Designed and implemented a role-based registration and authentication system to restrict premium content to registered users, boosting user retention by 15%.
• Integrated US and European oil-industry news APIs to automatically surface real-time updates on key site pages, driving a 20% uplift in engagement.
• Developed a keyword-driven search plugin that automated content indexing and updates, cutting manual CMS workflows by 60%.
Stack → WordPress · PHP · ACF · HTML5 · SCSS · JavaScript · REST API · Git

Full-stack Developer Corpsoft.io · Full-time (Jan 2022 - May 2022 · 5 mos)
Built and styled websites in WordPress by developing custom themes and configurations.
• Collaborated with cross-functional teams to design and implement new web-app features in line with brand guidelines.
• Partnered with designers and developers to define requirements, prototype, and build UI components that reflect the company’s visual identity.
