Особисті якості, хобі, захоплення, навички: My name is Diana. I am a UI\UX designer. Since the age of 15, I have been developing myself as a designer, this is exactly the story of when a hobby becomes a job, though it still brings pleasure. My hobby is vintage photography. Also, I enjoy reading, drawing, computer games, writing poems, and having a cup of good tea or coffee. I know the basics of user interface psychology, study typography, marketing, and a bit of psychology in general. In my work, I try to adhere to logic and minimalism, I can competently argue my every decision and experiment with trends and styles. I have experience in polygraphy, advertising banners, brochures and books, book illustration, website content, maintaining branding pages on social networks, and creating websites using WebFlow. At the moment, I am studying in the 5th year of the Ukrainian Academy of Printing, in the Faculty of Graphic Design, part-time study.

Мета пошуку роботи, побажання до місця роботи: I am looking for a job where I will grow as a UI/UX designer, solve user problems and learn new things.
