Software Engineer specializing in Mobile, Front end, Back end, and Full Stack development, focused on creating high-quality cross-platform applications.

My primary focus is Flutter/Dart for mobile and web development - building performant apps with custom animations, clean architecture, and comprehensive testing.

I also have strong expertise in Front end technologies including TypeScript, Vue.js, Nuxt.js, React.js, Next.js, and TailwindCSS, with emphasis on delivering exceptional user experiences.

On the Back-end side, I work with Python, Node.js, Elixir, Erlang, Phoenix and PostgreSQL to build robust, scalable server-side solutions and REST APIs.

Throughout my career, I have contributed to projects ranging from fintech mobile apps and enterprise evaluation platforms to advertising and iGaming systems for clients in UA, EU and US markets. I thrive in agile environments, value continuous learning, and focus on delivering quality code within tight deadlines.  
Also creating and maintaining Telegram bots, Web scrapers, Browser automation and AI integration

Here's a snapshot of my skills:

→ Mobile & Hybrid: Flutter, Dart, NativeScript, PhoneGap, Cordova, Electron

→ Front end: JavaScript, TypeScript, React.js, Next.js, Vue.js, Nuxt.js, Angular, AngularJS

- Back end: Python, Node.js, Elixir, Erlang, Phoenix, Ecto, PostgreSQL
- Markup & Styling: HTML5, CSS3, TailwindCSS, Vuetify, SCSS, SASS, Bootstrap
- State Management: Provider, Vuex, Pinia
- Tools: Git, Gulp, Webpack, Vite
- Testing: Jest, Flutter Test, Unit & Integration Testing
