Опис

Hello. My name is Viktoriia. I am a 3D visualizer of interiors.

I create visualizations of interior design based on information from the designer or customer, taking into account all wishes for style, color scheme and lighting. All visualizations are made with high quality and thought out in detail.

I always keep in touch with the client, as this is very important for a well-executed project.

Scheme of work:

Step 1: I receive a technical specifications from you: floor plan, lightning, models, textures. If you have any sketches or references of the interior's you like, that is also welcome.

Step 2: 1 create a visualization in a draft version (1200px on the larger side)

Step 3: You make the edits

Step 4: 1 make changes to the project and send you the renders for approval.

Step 5: If you confirm, I will send you the final renders in high quality.

Turnaround times: The terms depends on the complexity of the project and the number of angles. On average, it is 2-5 days.

Price: The price depends on the complexity of the project. On average, it is 30-80 for one angle.

Payment scheme:

Without prepayment.

50% - after the first renders, 50% - after the final renders. Number of edits: in 3 stages.

For my work I use 3Ds Max 2023 and Corona Renderer. Also can use Fusion, Adobe Premiere Pro and Adobe Photoshop

My working hours are from 9 am to 8 pm. No days off.
