- Created QA documentation: AI-driven Test Strategy, QA Acceptance checklist for Web Page Releases, Test Plans

Responsibilities:

- Full-Stack QA collaboration with Frontend and Backend developers
- Web & SEO/AEO testing of WordPress sites
- API & Backend testing: REST APIs, backend integrations, server-side functionality
- AI project testing: AI agent interfaces and machine learning applications
- Test documentation: test cases, checklists, detailed bug reports
- Cross-browser testing and debugging with browser DevTools
- Implementing and following SDLC testing methodologies

Tools: Claude AI, Claude Cowork, Claude Code, Rovo AI, ChatGPT, Google Gemini, n8n, GitHub, Devin Desktop (Windsurf), Screaming Frog SEO Spider, Google Apps Script, BrowserStack, Chrome DevTools, Sentry.

Manual Testing Engineer

Auditdata (IT, healthcare software), Київ
06.2022 – 09.2025 (3 роки 3 місяці)

Обов'язки:

Projects: Healthcare CRM system for audiological clinics (web application); Data Migration Testing; BI & Reporting.

Approaches: Microservice architecture; ETL.

Achievements: Created a QA Strategy for a data migration project, improved testing processes in the team.

Responsibilities:

- Manual testing; requirements analysis
- REST API testing; running SQL queries
- Specification clarifications and updating
- Creating and executing test cases

- Bug reporting, bug tracking, bug fix verification
- Preparing data and test environment for final demonstration
- Working in Agile (Scrum)

Tools: Azure DevOps, Swagger, MS SQL Server Management Studio, Visual Studio, Azure Data Factory, DevTools, Postman, Figma.

QA Engineer & Computer Systems Analyst

MSL Ukrainian state lottery (Lottery / IT), Київ

10.2021 – 07.2022 (9 місяців)

Обов'язки:

Part-time, hybrid. **Projects:** Central System, Lottery Terminals.

Achievements: Developed custom tools for testing lottery tickets.

- Testing of operations, developments, software and hardware products
- Preparation of functional testing documentation (test cases, checklists, user guides)
- Support of the test environment
- Reporting software failures, technical deficiencies and non-compliance with requirements
- Support for software releases, upgrades and new functionality
- Vulnerability, stability and load testing
- Quick response to end-user problems and verification of fixes

Middle QA Engineer

Forte Group (IT, outsourcing), Тернопіль

06.2014 – 09.2021 (7 років 3 місяці)

Обов'язки:

Project: Forte Time Tracking — enterprise time management software (incl. Forte Group HRMS).

- Developed, prioritized and executed Test Cases ensuring proper test coverage
- Manual, Gray-box, Web, UI/UX, Regression, Functional, Performance, Smoke, Security and REST API testing; Cross-browser and Responsive Design testing
- Analyzed Jenkins and Tomcat logs on Linux Server, back-end database data; reviewed code
- Suggested improvements to application design and test processes
- Involved in hiring as an interviewer; mentored and led new team members
- Created automation tests (Java, Selenium)

Environment: JIRA, Zephyr, Confluence, SSH, Linux, Swagger UI, Postman, Docker, Jenkins, TestNG, Maven, Git.

Earlier roles at Forte Group: QA Analyst (06.2016–12.2016, Fitness Forecast web app for a US BI company); QA Analyst (06.2015–05.2016, university portals, CRM data migration and Salesforce integrations for a US education company); Junior QA Analyst (06.2014–05.2015, eBook readers Follett BryteWave, FollettShelf).
