Знание языков

Русский - Профессиональный (эксперт), Украинский - Продвинутый (свободно), Английский - Средний

Дополнительная информация

Знание компьютера, программ: I have been working in the large projects for many years. I can quickly understand an existing code, optimize it, add test coverage and integrate a new functionality to it. I am a good team player: I am sociable, helpful and self-motivated. I help my colleagues and do not hesitate to ask questions to benefit the cause. I prefer consistency, so I am able to work for a company for a long time. I am always open to new opportunities, not only in the field of Java development. If a new area interests me or is necessary for my work, I am always ready to study it on my own or to take a relevant training course. Shortly about professional skills • More than 13 years experience in Java and about 7 years in back-end development • Have experience in Java Frameworks, such us Spring, Spring Boot, Spring Bean, Spring Data, Spring MVC, Hibernate • Have experience with microservices and multithreaded applications • Have experience in front-end development (React, Redux, TypeScript/JavaScript, JQuery, JQueryUI, JSP) • Have experience in automation testing (JUnit, Selenium, TestNG, Jest) • Quick master for new materials • Good sociability and diligence Common list of Computer Skills: • Java, Spring, Spring Boot, Spring MVC • Design Patterns • JDBC, PostgreSQL, Oracle, GraphQL, Spring Data JPA, Hibernate • RabbitMQ • React, Redux, Servlets, JSP, JSTL, XML, JSON, etc • JavaScript/TypeScript, HTML, JQuery, JQueryUI, CSS • Swing, Applets • Glassfish, Tomcat, Jetty • SVN, Git, Perforce • Maven, Ant • Docker • Python • Machine Learning • Android development • IntelliJ IDEA, Eclipse • VisualProlog and using of fuzzy logic and linguistic model of representation of fuzzy knowledge • C ++, Delphi • CorelDraw, Photoshop, AutoCad, MathCad
Цель поиска работы, пожелания к месту работы: Find the position of Java Developer. It is desirable to work with Back-End, but Front-End, Full Stack and automation testing is also interesting. I would be happy to work with a good team and with new technologies.
