Знание языков

Русский - Профессиональный (эксперт), Украинский - Продвинутый (свободно), Английский - Средний

Дополнительная информация

Знание компьютера, программ: I have been working in the large multithreaded projects on Java for many years. I can quickly understand existing code, optimize it, add test coverage and integrate new functionality to it. I have good experience in relational databases. I am a good team player: I am sociable, I help my colleagues and do not hesitate to ask questions to benefit the cause. I always open to new opportunities, not only in the field of Java. Areas of interest for growth: Machine Learning, mobile development, GO, etc. I am ready to take a training course if necessary in the required ares. Shortly about professional skills • More than 10 years experience in Java and about 5 years in back-end development • Have experience in Java Frameworks, such us Spring, Spring Boot, Spring MVC, Hibernate • Have experience in front-end development (JavaScript, JQuery, JQueryUI, JSP) • Quick master for new materials • Experience with multithreaded applications • Good sociability and diligence Common list of Computer Skills: • Java, Spring, Spring Boot, Spring MVC, Hibernate JPA, Swing, Applets • Glassfish, Tomcat, Jetty, • Design Patterns • SVN, Git, Perforce • Maven, Ant • Servlets, JSP, JSTL, XML, JSON etc • JavaScript, HTML, JQuery, JQueryUI, CSS • JDBC, PostgreSQL • Docker • Python • Machine Learning • Android development • IntelliJ IDEA, Eclipse • VisualProlog and using of fuzzy logic and linguistic model of representation of fuzzy knowledge • C ++, Delphi • CorelDraw, Photoshop, AutoCad, MathCad
Цель поиска работы, пожелания к месту работы: Find the position of Java Developer with a lot of developments. It is desirable to work with Back-End, but Front-End and Full Stack is also interesting. I would be happy to work with a good team and with new technologies.
