Описание

Andrii Haponov

Junior /Middle Python Developer

Summary

I started studying programming half a year ago. In the process of learning I got acquainted with the programming language Python. Despite the fact that I am now 41 years old, there is a desire to develop in this direction.

In the past, working in various management positions, he achieved an effective work organization and excellent results. Working in the furniture industry, I decided to create the site itself and realized that I like this work.

Now I am looking for opportunities to start my journey in the IT industry.
