SUMMARY

I have always loved and admired complex things, and that's why programming became my main hobby. I am used to complex tasks, a quick search for solutions, and training. At the age of 13, I became interested in programming, in 2017 I entered the IT Academy and participated at the end of my studies in an educational project on C# .NetFramework. After that, I performed orders for freelance on Python, Kotlin, lua. Also, I have some programming experience on C, C++, Java, SQL
