Summary

I am a results-oriented Java developer seeking a full-time position where I can apply my knowledge and skills in Java Development. I have been practicing Java for more than half a year. Furthermore, I've learned Java Core, and the technology stack required for a developer and have completed several own projects, where I got an understanding of how Java works with WEB (Tomcat), databases (MySQL), JDBC, Hibernate, Spring framework and how to test my application (JUnit) and Angular, JS, TS.

Technical Skills

- **Java:** Java Core, Java 8, Collections, OOP, SOLID
- **DB:** JDBC, Hibernate, RDBMS (PostgreSQL, H2, MySQL, SQLite)
- **Web Development:** Servlets, Tomcat, JSP, HTML/CSS, XML, JSON, Bootstrap, ANGULAR, JS, TS
- **Spring:** Spring Core, Spring Web, Spring Security, SpringBoot
- **Tools & Libraries:** Maven, JUnit, Mockito, Log4j
- Enterprise/integration design patterns
- **Operating systems:** macOS, Windows
- **Version Control Tool:** Git
- **IDE:** IntelliJ IDEA, VSCode
- **Languages**: English Intermediate, Polish Advanced
