Projects:

VIPVIP - a comprehensive app that provides users with all the necessary information about businesses and stores in their area, while also offering exclusive discounts and rewards.
play.google.com/store/apps/details?id=com.vipvip&hl=uk&gl=US

VIPVIP - an innovative platform that empowers business owners to create their own mobile apps without any technical knowledge or programming skills.

Incognito Privat Messenger - the world's first messenger without user identification. The application allows communication without sending SMS for verifying your number and scanning the phone book list. Simply create a chat and invite one or more participants.

Axioma Life - an innovative, rapidly growing company developing high-tech IT products that improve people's quality of life worldwide. The company combines all the advantages of the IT sphere and direct sales. We attract inventors, visionary inspirers, and implement the most interesting and promising projects.

QA Engineer, IntellectSoft (October 2022 – September 2023)

Responsibilities:

- Analyzing product requirements documents
- Writing test suites and test cases in Qase
- Identification of problem areas, adding them to Trello
