Описание

Hello :)

My name is Yaroslav, I am a frontend developer. I am ambitious, disciplined and highly motivated, with a great desire to learn and develop specifically in the front-end direction.

I completed the DAN.IT EDUCATION courses for the position of FrontEnd Development, so I have several projects in my portfolio.

I have such a stack of technologies as: HTML5, CSS3, JavaScript (ES6+), React, Redux, Router, SCSS, OOP, styled-components, Fetch, Formik, Yup, AJAX, Jira, Figma, Scrum.

Also, after employment, I have a great desire to take English language courses at an advanced level. I have an unreal desire to learn and develop, and I want to find a company with which we will do this together.
