Have created the basic layout of a website using React, HTML,
and CSS.Participated in knowledge transfer sessions for new
people joining the project.

**Languages**

Russian
Romanian
Ukrainian
I have a basic understanding of English.

**About me**

Passionate and enthusiastic developer with love for front-end development, Discord bots creation, and server-side programming. Began my journey in web development through an ITDVN course, which led me to explore the fascinating world of Discord bot development.
I spent six months fully engaged in learning and working on bots and server-side programming while advancing my front-end development skills. Throughout this time, I've had the opportunity to collaborate on various freelance projects, learning valuable lessons in project management, client communication, and problem-solving.
I'm excited to join a supportive team where I can continue to grow my interface development skills and contribute to exciting projects, with a focus on React and TypeScript. Confident in my abilities, I'm eager to take on new challenges and see where this journey leads me.
