Личные качества, хобби, увлечения, навыки: Greetings, I'm Oleksii, a service engineer for water treatment equipment. I have previous work experience in higher education and other fields. Concurrently, I've been studying at ITSTEP academy since 2020 to become a software developer. I'm still in studiyng process, but in 2023 I will get my diploma. I decided to change my career path because my current job doesn't bring me joy and doesn't align with my passion. Since childhood, I've always dreamed of being a game developer or programmer, and I've come to realize that dreams can be achieved. I possess personal qualities such as purposefulness, activity, sociability, responsibility, willingness to learn, and stress resistance.
