Описание

Greetings! My name is Nicolai.

I'm a full-stack developer with a strong focus on front-end development.

I have experience working with React, Next.js, Node.js, and NestJS, building scalable web applications from scratch. At Technology Oriented, I led front-end development, contributed to a custom UI library, and implemented Playwright tests for automation. I also developed a multi-page e-commerce website for water filters with a shopping cart and order flow (fullstack).

I value clean, maintainable code and enjoy creating fast, user-friendly interfaces that work seamlessly with backend logic.

Technical skills:

HTML,

CSS,

JavaScript, TypeScript

React, Next

Node Nest JS

REST-API

Playwright test,

Storybook,

Jira
