Описание

SOLOMIIA IVANOCHKO

PROFILE

My curiosity led me to the QA engineer course. And not for nothing, because I got to the point. I am a good observer and pay attention to details, so it helped me to finish the course perfectly and to get a lot of positive feedback from the tutors after completing the homework and thesis.

During the course I looked for the bugs on the chosen website, wrote the test cases and the checklists. I have mastered writing the bug reports, studied software QA methodologies, learned what Agile, Scrum and Kanban are. Studied API testing, worked with Selenium, SQL, Postman, Trello. Did the mobile testing.

I sincerely want to realize myself in this direction and hope for your feedback.
