#### Responsibilities at «mc design»

The team is engaged in outsourcing the product software development for commercial or non-commercial clients. In a team of 5 people, we create front-end for our clients and update the core of the products. Mostly I was doing:

1. Development of new highly nested components.
2. Maintaining documentation of my part of the project.
3. Participating in team processes: cross-review of code, planning and evaluating tasks.
4. Supporting and refactoring of old modules.

We worked using Trello. Managed documentation in Confluence.

Stack: React, Typescript, Vite, Redux, Git, CSS Modules, Prettier.
