SUMMARY

Full Stack Developer with experience in JS/TS, React, Node.js. I thrive in collaborative environments where I can leverage my problem-solving skills to tackle challenges and contribute to innovative solutions. With a keen eye for detail and a dedication to continuous learning, I am committed to delivering high-quality code and exceeding expectations in every project I undertake.

WORK EXPERIENCE

Frontend Developer, Teachers Rate, College Order Project

Developed a user-friendly interface.

Used methods of working with state for better data management.

Optimized the app for better performance.

Implemented new features to improve user experience.

Developed the architecture for the client side.

April 2024 - Pressent

PROJECTS

Social Network Converso

I created a social networking platform using

React and Redux for the front-end, and

Node.js with Express for the back-end.

MongoDB was employed as the database.

This combination allowed for a responsive

user interface, efficient state management,

and scalable backend architecture.

Calendar PlanWell

This web application, built with React,

TypeScript, and Styled Components on the

front-end and Node.js, Express, and MongoDB

on the back-end, helps users organize and

manage tasks and calendar events.
