Знание компьютера, программ: Junior Frontend Developer HTML CSS (Tailwind, SASS,SCSS) JavaScript TypeScript React JS NestJS Python Hello, I am looking for a job as a frontend developer. I am eager to join a real project as soon as possible to gain valuable experience and implement interesting and complex ideas. I recently completed a frontend development course and am actively engaged in self-learning. During my studies, I worked on several projects in a team, gaining non-commercial development experience. These projects allowed me to reinforce my acquired knowledge in practice and improve my collaboration skills I have experience in: - HTML, CSS (TailwindCSS, SASS, SCSS), JS, and TypeScript - React JS, Redux Toolkit, RTK Query, React Hook Form, ReactSelect, and Chakra UI - Currently studying backend with NestJS and Python Projects: 1.Name: Clone of Starbucks Coffee (https://github.com/ost-rudakevich/starbucks-coffee) Description: On the website, you can choose co ee or tea, customize it (select size, toppings, and type of milk), add it to the cart, and specify the quantity. 2.Name: English Learning Website (https://github.com/ost-rudakevich/english_leo) Description: In this project, I worked with a third-party API and used db.json for data storage. It is a website for learning English. After registration, users can add word cards to their dictionary with a translation and an audio track. 3.Name: Enjoy the movie(https://github.com/ost-rudakevich/reel) Description: My largest project. I developed both the frontend and backend myself. It is a website for watching movies with user registration and an admin panel. The admin has access to statistics and can edit or create content. Regular users can leave comments and ratings for movies.
