Опыт работы

Business Process Automator, Navigation Manager, Java Developer

IE Sonday V.V. (Retail), Калуш
12.2023 – По настоящее время (2 года 2 месяца)

Обязанности:

- **Creating and maintaining a simple CRM system** for hiring couriers by using **Spring MVC, Spring Security, Thymeleaf, Hibernate, PostgreSQL, HTML, CSS.**

- **Automated business processes** using tools like **Excel**, **Google Sheets**, and **Photoshop**, streamlining workflows and improving operational efficiency.

- Designed and optimized delivery routes, significantly improving logistics operations and reducing costs.

Achievements

- ● **Created a simple CRM system** where accounting is kept couriers, their statuses, their salaries. Divded of responsibilities between managers for interacting with these employees. As well as the ability to create reports in the Excel format.

- ● **Automated Interaction Between Excel and Photoshop**:
  Developed a solution to automate the process of exporting data from Excel and applying it to Photoshop templates. This reduced manual work by 40%, improving workflow efficiency and minimizing human error.

- ● **Streamlined Interaction Between Word and Excel**:
  Automated the integration of data from Excel into Word documents, creating custom reports and templates. This saved time by eliminating the need for manual copy-pasting and formatting.

- ● **Excel Automation**:
  Built custom macros and automated workflows in Excel to process large datasets, generate reports, and streamline data analysis tasks, saving up to 30% of time spent on repetitive tasks.

Java Developer

LLC "Cyrene" (Wholesale trade),
09.2018 – 07.2019 (9 месяцев)

Обязанности:

- ● **Developed and maintained Java, Spring based applications for a wholesale store**, ensuring seamless operations and high availability.

- Provided backend support for inventory management, order processing, and customer transactions.
- Worked with **Spring Boot, Hibernate, REST APIs, and PostgreSQL** to optimize system performance.

- ● Implemented automation tools to streamline business processes and reduce manual workload.
- Collaborated with cross-functional teams to enhance system stability and introduce new features.
