Опыт работы

Senior Shopify Developer / Theme Architect

UTD (IT development from e-commerce),
06.2021 – 08.2025 (4 года 2 месяца)

Обязанности:

Architected the core framework for five Shopify themes (Gain, Boutique, Ultra, Allure, plus

unreleased | this is 20+ style templates). Themes currently power 300+ stores across various

regions.

• Built and documented a long-lived JavaScript core (helpers, mixins, abstract components); more

than 60% remained unchanged for several theme generations.

• Developed key reactive modules: predictive search, filtering, dynamic product variant system,

product gallery, infinite scroll, mega menu, minicart, lazy loading, etc.

• Ensured full AA accessibility compliance, maintaining 98–100 A11y scores.

• Executed complex platform upgrades: Webpack -> Rollup -> Vite, Vue 2 -> Vue 3, Tailwind 2 ->

Tailwind 4

• Extended Themplify builder with Rollup and multi-mode build pipelines.

• Achieved consistent PageSpeed scores of 70+ on mobile and 90+ on desktop for heavy pages.

• Delivered urgent production hotfixes, including outside standard working hours.

• Created comprehensive developer documentation (JSDoc) and user guides that significantly

reduced onboarding time, minimized support load, and saved hundreds of developer hours across

multiple product cycles.

Образование

Admiral Makarov National University of Shipbuilding, Mykolayiv (Николаев)

Специальность: systems engineer

полное высшее, 09.2014 – 06.2018 (3 года 9 месяцев)
