Описание вакансии

Mobiwolf is looking for two quality oriented, creative and inventive **Android (Kotlin) Developers**. You will be a part of the team working at mobile application development projects for the UK and the USA clients. Taking into consideration the current war state and energy crisis in Ukraine, we are forced to be as **flexible and adaptive** as we can. This is because our aim is to keep strong and guaranty in time delivery of quality service to our clients in any ways. The range of possible **extraordinary options could be as following**:

- Working mode - freelance, remote
- Working place - from home, from office, mix, outside/inside Ukraine
- Energy Equipment - UPS, inverter + accumulator, power bank, generator
- Internet - cable, mobile 4G, Starlink

Responsibilities:

- Readiness to be flexible and adaptive together with us
- Delivery quality software on time and with acceptable quality
- Communicate effectively with other development team members and clients

Must have:

- Android architecture and APIs knowledge
- Good skills in Android development.
- Completed mobile projects.
- English - intermediate
- Using GitHub

Willing and ability to learn quickly:

- Kotlin
- BLE, coroutines, jetpack compose, mvvm, clean architecture, room, retrofit, hilt/di/dagger2
- Knowledge in other mobile platforms
- Intermediate English
- Knowledge or experience with SCRUM
- Experience in GUI design for the Android platform

Apply by sending your full CV with description of your completed Android projects. Please specify the required hourly rate.
