Описание вакансии

Corinne is currently seeking a very highly motivated and target driven Senior iOS Software Engineer

A growing development team seeks a Senior/Lead iOS Developer to help build the next phase of enterprise applications. You will be responsible for leading a team of developers in all aspects of Mobile Application development including but not limited to Application Architecture, Interface Development, API Design and Development Oversight.

An experienced and well-versed Mobile Application developer is required to steer the development of our products. If you are a Developer who feels underutilized and not challenged, then this could be the right opportunity for you!

Responsibilities

- Contribute to the creative process by participating in concept and ideation sessions
- Develop rapid prototypes to lead customers in defining a mobile creative strategy
- Use test-driven development methods to ensure ongoing quality of all code developed
- Maintain UI consistency throughout different components of the application
- Improve legacy UI code and contribute to UI pattern library
- Work with cross-department teams to assure consistent UX across all assets
- Write advanced, readable, re-useable code
- Assist in the development and implementation of coding standards
- Optimize code (written by you and others) for application performance

Requirements

- Very experienced with the two most current versions of the iOS SDK
- Complete understanding of standard iOS interface components such as table views, navigation controllers, various button and control types, etc., as well as creating custom interface elements
- Experience working with Core graphics and Core animations
- Complete understanding of Cocoa programming methodologies and memory management
- Experience with Web Services and JSON and XML-formatted return data
- An understanding of block and multi-threaded-based programming concepts

Experience with source control systems such as Git, SVN, etc.

Familiarity with Apple's enterprise developer accounts and ad-hoc distribution on standard developer accounts

5+ years of experience in software development with at least 3+ years of mobile iOS development

Strong mobile UX design, coding and support/maintenance
