Пожелания к сотруднику

Образование: полное высшее
Опыт работы: от года
График работы: полный рабочий день

Описание вакансии

Get hands on to test, document, and implement improvements.

Become our Quality Assurance Automation Engineer and you'll see what it's like to fly with a great team. You'll use your skills and experience to plan, manage, and improve upon all of our testing activities. Automated and exploratory tests are your forte. You're great at homing in on issues and documenting defects, and you love to work on both new and existing projects.

Responsibilities:

- Reviewing specs and other technical documents
- Providing valuable feedback & introducing ideas to enhance QA processes
- Creating test documentation - test plans, test cases, test/defect reports
- Working with teams to ensure quality development of applications
- Managing QA continuous integration jobs
- **Performing automated and manual testing**
- Performing regression testing
- Documenting work and team meetings to share knowledge

Desired skillset and experience:

- You have an eye for detail
- You're familiar with Windows, Mac, and Linux operating systems
- You've got a strong grasp of QA methodologies, tools, and processes
- You're great at analyzing, diagnosing, and solving problems
- You know about automated and manual testing
- Experience writing test plans, test cases, test/defect reports
- Experience with testing - functional, usability, regression, load/stress, performance
- Experience testing web and mobile applications
- **Experience using Java, JavaScript, CSS, DOM, Selenium WebDriver for tests automation (at least 1 year)**
- **Helpful to have experience with Jenkins and Linux shells**

Personal qualities:

- You love finding and resolving software issues
- You're comfortable working on multiple projects, both new and existing
- You work well on your own and with a team
- You listen well and welcome criticism
- You voice your concerns and aren't afraid to provide input

Education and background:

- You have at least a bachelor's degree in Computer Science, Mathematics, or Engineering, or you have equivalent work experience
- You have a proven track record in the software development environment, with completed projects to showcase your

experience

We offer the following benefits:

- Challenging, often cutting edge projects;
- Career and professional growth;
- Individual approach to work compensation based on qualifications, work results and ethics;
- 27 paid days off a year;
- Year-end bonus based on eligibility and performance;
- Professional and friendly team;
- Comfortable workplace;
- Flexible work schedule
