Описание вакансии

Full stack developer

Possible relocation to US or Latin American office

Description:

If you are an experienced Full Stack Developer, willing to take a role in an international team, working on amazing projects for world-class clients like Shell, Hewlett-Packard, Nike and others then we will be glad to see you in our team

We expect from you:

- Commercial experience using C#/.Net;
- Working proficiency in technical English;
- Ready to learn new technologies;
- Willing to adopt the company development standards;
- Experience in assessment and solving technical tasks, code review;
- Team player, easily building communication;
- Experience in communicating with English speakers on technical issues;
- Knowledge in basic principles and different ways of programming, following new technologies and finding new solutions;
- Result-oriented, business-oriented.

Must have:

- .NET Framework 4/4.5 – 5+
- Restful services – 4+
- ASP.NET Web API – 5+
- ASP.NET Core – 2+
- Angular 5 or above – 2+
- Typescript
- HTML 5
- HTML Widgets
- CSS, less
- Strong OOAD
- C#
- AOP
- Messaging Brokers
- Windows applications
- Console Applications
- NoSQL Databases like MongoDB
- Async/Await
- Micro ORMs
- WITSML standard

Nice To Have:

- Microservices
- Websockets
- Interprocess communication
- Multiprocess Architecture
- Windows Services
- Basic understanding of LAS, WITS
- Caching
- Message Queues
- Kendo

Job Responsibilities:

- Design, develop, implement and support application systems to meet business, informational, and technical needs. This position is also expected to provide guidance to Systems Analyst when necessary.
- Identify potential problems and recommend solutions to the most complex data design scenarios
- Provide estimates, deliver well documented program code and prepare code in accordance with Nabors designs usability, performance standards, and graphic user interface
- Assist as technical data resource to cross functional teams
- Develop, code and/or configure and test programs from clear specifications to meet business needs and ensure functionality of applications
- Diagnose and solve common system problems while working under pressure to meet aggressive deadlines in an environment with limited resources
- Assist on projects involving complex interfaces and interdependencies between systems and also integrating multiple solutions
- Participate in systems design, working within an established framework to maximize system efficiency
- Develop detailed flowcharts to show processing logic for simple programs; debug systems to provide daily operational support for production systems

Our company was established back in 1996 with HQ in Houston, Texas. Now we are having more than 70 people in our steadily growing team with offices in Quito, Ecuador and Lviv, Ukraine.
