Описание вакансии

What we expect from you:

- Reinvent fulfillment by designing, developing, testing, deploying, maintaining and improving pragmatic software;
- Manage individual project priorities, deadlines and deliverables;
- Contribute actively to code reviews and design reviews;
- Design, build, and maintain APIs, services, and systems;
- Perform and assist fellow developers through code reviews, feature enhancements, bug fixing and general support;
- Writing and running e2e, unit tests to shorten your integration cycles and improve code quality;

Requirements:

- At least 3 years of experience as a Sr. Backend Developer, overall experience 5+ years;
- Modern PHP7 (we will use 7.4) including but not limited to generators, strict types, return types;
- Experience with one or more modern PHP frameworks (Phalcon, Laravel, Symfony). We will use Phalcon;
- Using migrations, seeders, fakers;
- Queue management;
- Covering code with unit tests, performing integration tests, e2e tests (phpUnit/Behat/Codeception);
- Solid knowledge and experience of OOP design pattern (not only Singleton);
- Solid knowledge and experience of data structures (<https://php.net/ds>);
- Knowledge of relational databases (we use PerconaDb w/ TokuDB);
- Utilizing key-value storages (Redis, Aerospike, etc);
- Git;
- Nginx;
- Bash;
- Composer;
- Familiarity with Agile/Scrum/Kanban methodologies;

Bonus point:

- DDD;
- Zephir lang;
- Other programming language (Go-lang, Python, Java, C#, Javascript, etc);
- MongoDB;
- Docker, K8;
- ReactPHP/Swoole;

What we offer:

- Free schedule, full-time, employment 40h per week at any time convenient for you;
- A young team focused on growth and results;
- A close-knit team with a culture of mutual assistance and mutual understanding;
- Flexible development process, training and knowledge sharing;
- Timely payment with reference to a stable currency;
- Career growth;
- Variability of work, a lot of projects with varying complexity. We use the latest technology;
