день

Описание вакансии

The successful candidate will be writing server logic for games using technology:

- Asp.Net API v2
- SignalR
- Photon server or Forge networking (for real-time games)
- Good knowledge of databases is also important.

Databases We Use

- PostgreSQL
- Redis
- MemCached

Responsibilities

- Work with AWS cloud hosting (Amazon Web Services)
- Being able to optimize queries and work with a large amount of data in databases is a plus.
- We also pay attention to the knowledge of algorithms and the ability to solve logical problems
- All projects are in the .net ecosystem, with Unity on the client-side, there is a common logic for the server and the client, which accelerates the development and stability of the project.

We Offer

- Flexible working hours
- Regular performance reviews
- Comfortable office
- Days off
- Paid sick-leaves
- Fun corporate events
