Пожелания к сотруднику

Образование: средне-специальное
Опыт работы: от пяти лет
График работы: полный рабочий день

Описание вакансии

Sweden needs skilled engineers! About 30,000 of them by 2030 to be precise, according to the Swedish Statistical Central Bureau. Right now we have ~ 200 open positions for Software Engineers with our clients in Sweden and we need to expand our consultant pool with ASIC verifiers with IP level experience.

Since early 2000 we have employed and relocated engineers to Sweden from all over the world. We are certified by the Swedish Migration Board and have a well established process for bringing in You and Your family to Sweden with work & residence permit. During our nearly two decades in business we have a 100% completion and approval rate - every time and for every case.

Our consultant pool consists of consultants within the fields of security, automotive, embedded systems, telecommunications, online solutions, and application development. Now we are looking for several engineers to join us in different positions in these areas.

Job Description

Requirements and responsibilities:

- Proficient with verification using UVM methodology
- Strong collaborative skills with System Architects and Integration teams
- Proficient in verification planning, reporting and driving verification closure. Must understand how a verification project works, from start to finish
- Experience with IP level and system level verification
- Strong team player
- Excellent communication skills, both written and oral English
- Experience with UNIX and / or Linux
- At least 7 years in ASIC / FPGA industry
- Strong work ethics

Good to have:

- Experience with UART, SPI, I3C protocols
- Experience with analog-mixed-signal type ASICs
- Experience using formal properties and tools, such as Jasper, OneSpin, InFact and similar
- Experience in using golden models / reference models in a test bench
- Experience in agile ways of working, agile scrum
- Clearcase version control system experience
- VHDL knowledge
- C-programming
- Scripting in Perl, Python, Bash or C-shell
- More than 10 years in the ASIC / FPGA industry

What's in it for you?

For this position we offer a salary of 38000-45000 SEK gross per month, based on the level of prior experience. About 30% goes in taxes whereof up to 18.5% is automatically credited to your personal pension plan which you will receive regardless of which country you reside in upon retirement.

In addition to the salary Telescope Services offers:

- Occupational pension plan corresponding to 4.5% of the gross salary (added on top)
- Five weeks paid vacation per year
- Income insurance
- Work liability insurance
- iPad or laptop
- Governmental pension plan
- Mobile phone with data plan subscription
- Language course support
- Sports contribution
- Relocation package

Also included in the package is that Telescope Services will:

- Handle the work permit application process from “A” to “Z”, for you and your family
- Arrange your tickets to Sweden, for both you and your family
- Help you in finding an apartment; you will have a place to stay when you arrive to Sweden
- Provide expat service once landed in Sweden.

Start: ASAP, or when Your current obligations allow.

Extent & Duration: Long term.Full time as employee.
