Описание вакансии

We are looking for frontend developer to maintain and add improvements in our hybrid mobile app and our back-office website (both developed on angular). Our APP is running on both Android and iOS and works offline. We are looking for someone with experience in Ionic Framework + Angular and with experience in HTML, CSS and JavaScript to help also in the web development of the company. We want a developer that is passionate about technology and improving the user experience and has abilities to test and provide high-quality solutions.

Role and Responsibilities:

- Maintain and improve the current solution
- Design and implement new futures
- Ensure that all the functionalities work well across the different platforms
- Help with the front-end part for the website of the company
- Propose improvements in the user experience
- Help junior engineers to learn about the frontend development.

Required Technical skills

- Bachelor's degree in Computer Science/Engineering or a related technical field, or relevant experience in computer software engineering
- 2-5 years of experience working with Ionic, Angular, CSS, HTML and JavaScript
- 2-5 years of experience developing hybrid mobile applications
- 2-5 years of experience developing websites
- 2-5 years of experience passionate about user experience
- 2-5 years of experience working on agile development teams
- 2-5 years of experience testing and delivering apps in Android and iOS
- Experience working with Git, Jira and Confluence
- Desirable: knowledge of NFC communications and connection protocol and experience developing applications using them.
- fluent English

Soft skills

- Flexible
- Open-minded
- Interest for learning
- Committed
- Team player
- Autonomous
- Proactive
- Driven by objectives
- Passion for technology
- Love for startups
