Описание вакансии

Our client is one of the largest online gambling companies in the world with over 30 million customers globally. The platform supports a portfolio of brands like Unibet, Maria Casino etc. A customer-focused and fast-paced organization.

To enhance the team, we are looking for a skilled Software Engineer in Test Automation.

The Role:

As a Software Engineer in Test Automation, you will be a part of one of its cross functional teams (consisting of 6-10 team members). Each team's purpose is to create the best customer experience, to continuously improve their products while keeping up with the latest technologies. The company works in an Agile way with open communication, trust and compassion.

Company Tech Stack:

Testing: TestNG, Junit

Development: Java, Spring, Spring Boot, JMS, JSON, Oracle

Monitoring: Grafana, influxDB & Splunk

Pipeline: Git, Maven, Jenkins, Docker, Kubernetes, Continuous delivery

Ways of working: Best development practices, Agile and lean values

What you will do:

You will be expected to take part of the full software life cycle to ensure reliability and up-time of the production environment.

By joining one of the teams, you will not only be automating the integration tests or creating performance test scripts, but also learning, growing and developing as an Engineer by participating in design discussions with your colleagues to find great solutions to complex engineering challenges.

You work closely with the developers, architects and the product owners to understand new feature building and what the specific requirements are

You will be responsible for planning and executing tests to ensure new features and products work as intended

You create test plans and other relevant documentation and you design and execute test cases

You think about what is good for the products in the long term when you make decisions

Desired Candidate Profile:

You have already a significant professional experience in Test Automation

You are detail-oriented and have a curious mindset to understand the products and to ensure their continued stability

You are experienced at solving challenging problems in a fast-paced, ever-changing environment

You deep dive to find the root causes of issues and propose solutions

You are passionate and experienced with backend testing but are not hesitant to explore frontend testing if needed in your team

You are a problem solver. You are open to learning new technologies to improve the impact you make

As a team player you are willing to contribute towards the full responsibilities of the team

You are a role model in behavior (proactive communication, collaboration – within and across teams) with a positive mindset

You are curious and ask questions to understand better and ask for help when you need it

Benefits & Perks:

- Flexible working time, remote or on-site – up to you
- Budget to set-up your home office
- Covered training and certification courses (annual budget for you), covered workshops or conferences to improve your personal development.
- Company retreats plus monthly team meetups (expenses covered) for team-building.
- Additional Health Insurance
- Monthly reimbursement for a gym membership, massage and others, promoting a healthy lifestyle.
