Agile and lean values

The Role:

You will be part of a cross-functional team of talented developers working together to create the best Sports Betting experience in the world.

Participate in all aspects of the work, from initial planning and setting up component architecture to maintaining our components and handling issues.

Your expertise lies within JavaScript, React and NodeJS development but there will be opportunities to technically support your colleagues on other technical domains as well.

Developing modern and reusable front-end components, that build up the entire customer-facing sports betting experience.

Take ownership and develop reliable high-quality code.

Desired Candidate Profile:

You have at least 5 years of experience working as a developer.

You are able to build scalable software in a distributed architecture and above all, you are passionate about solving challenging problems in a fast-paced and ever-changing environment.

You take great pride in your ability to grasp complex business scenarios and translate them into solutions with clean and performant code.

You are communicative and positive thinking.

Benefits & Perks:

- Flexible working time, remote or on-site – up to you
- Budget to set-up your home office
- Covered training and certification courses (annual budget for you), covered workshops or conferences to improve your personal development.
- Company retreats plus monthly team meetups (expenses covered) for team-building.
- Additional Health Insurance
- Monthly reimbursement for a gym membership, massage and others, promoting a healthy lifestyle.
