Описание вакансии

We are US based consulting company with 30 Ukrainian engineers. We are looking for a QA test automation engineer who can build Appium tests in Java (not Python).

Qualifications:

Expertise in using automation frameworks for testing web applications (mobile would be a plus).

Proven experience in identifying, reporting, and managing defects and issues within an automated testing environment.

Strong programming skills in Java.

Experience in using and customizing test automation tools: Appium.

Excellent analytical and problem-solving skills, with a keen eye for detail.

Ability to work independently as well as collaboratively with other teams and stakeholders.

Requirements

3 years+ of work experience in an QA role with a focus on automation testing;

Experience in developing and executing automated test scripts using automation tools such as Appium;

Expertise in a programming language Java;

Knowledge of testing on mobile devices (iOS, Android) using Appium;

Knowledge of UX automation principles for mobile applications;

Experience with testing in an AWS environment;

Experience in security testing on mobile devices;

Experience in hardwear automation;

Level of English — from Upper-Intermediate (spoken/written).

Additional Information

8 hours work day, M-F.

Remote.

Recruitment Process

Submit your CV and describe your experience with traffic management or network projects.

Initial interview (15 min administrative questions).

Technical interview with the team (30 minutes).

Offer.
