Описание вакансии

Job Title: Mid-level Back-end Software Developer

Company: RI Software

Location: Remote

Compensation:

As a Mid-level Back-end Software Developer at RI Software Company, you will be compensated through our partnership model. We do not offer a traditional salary but instead provide a unique opportunity for partnership and profit sharing.

You will have the chance to become a co-owner of our company and benefit from the success and growth of our business. Further details regarding the partnership structure and profit sharing will be discussed during the interview process.

About the Company:

RI Software is a forward-thinking software development company that is reshaping the industry with its innovative web applications. Our ecosystem includes various dynamic web services, such as a retail marketplace, a wholesale marketplace, a business management service, and a job offering service. Our mission is to empower businesses by simplifying operations and enabling seamless data sharing across our services.

Job Description:

We are in search of a talented and experienced Mid-level Back-end Software Developer to join our remote team. As a Mid-level Back-end Software Developer, your responsibilities will include designing, developing, and maintaining the server-side components of our web applications. Collaboration with front-end developers is crucial to ensuring smooth integration and optimal performance. Your role will be pivotal in building our groundbreaking system and contributing to the future success of our company.

Responsibilities:

- Design, develop, and maintain robust and scalable server-side applications using appropriate programming languages and frameworks.
- Collaborate with front-end developers to integrate user-facing elements with server-side logic.
- Implement and manage APIs to facilitate seamless data communication between different services.
- Optimize application performance, ensuring fast response times and efficient data handling.
- Uphold the security and integrity of back-end systems by implementing suitable security measures and safeguards against common vulnerabilities.
- Collaborate with the team to analyze project requirements, propose technical solutions, and provide accurate development estimates.
- Conduct comprehensive testing and debugging to identify and resolve issues, ensuring the delivery of high-quality products.

- Stay updated on industry trends and best practices, continuously enhancing your skills and knowledge in back-end development.

Qualifications:

- Demonstrated experience as a Mid-level Back-end Software Developer, with a strong focus on server-side development.
- Proficiency in programming languages such as Python and SQL, along with experience in Flask.
- Knowledge of database design, management, and optimization.
- Familiarity with RESTful API development and integration.
- Understanding of security best practices and a track record of implementing security measures in back-end applications.
- Experience working with cloud platforms (e.g., AWS, Azure) is a plus.
- Strong problem-solving skills and the ability to work both independently and collaboratively in a remote team environment.
- Excellent communication skills, with the ability to effectively convey complex technical concepts.

How to Apply:

Interested candidates are encouraged to submit their resume, portfolio, and any relevant work samples via the following link:
