Описание вакансии

Job Title: Data Science Specialist

Company: RI Software

Location: Remote

Compensation:

As a Data Science Specialist at RI Software Company, you will be compensated through our partnership model. We do not offer a traditional salary but instead provide a unique opportunity for partnership and profit sharing.

You will have the chance to be a co-owner of our company and benefit from the success and growth of our business. Further details regarding the partnership structure and profit sharing will be discussed during the interview process.

About the Company:

RI Software is a cutting-edge software development company revolutionizing the industry with our innovative web applications. Our ecosystem comprises various dynamic web services, including a retail marketplace, a wholesale marketplace, a business management service, and a job offering service. We aim to empower businesses to thrive by streamlining operations and facilitating seamless data sharing across our services.

Job Description:

We are seeking a skilled and experienced Data Science Specialist to join our remote team. As a Data Science Specialist, you will play a crucial role in analyzing and interpreting complex data to drive business decisions and enhance our web applications. Your expertise in data science techniques and machine learning algorithms will be invaluable in uncovering insights and patterns that fuel our system's continuous improvement and success.

Responsibilities:

- Utilize advanced data science techniques to extract meaningful insights from large datasets, enabling data-driven decision-making.

- Collaborate with the back-end and front-end development teams to integrate data science solutions into our web applications.

- Design, develop, and implement machine learning models to enhance user experience and optimize system performance.

- Conduct in-depth analysis of user behavior, market trends, and application performance, providing actionable recommendations.

- Work with various data sources, including structured and unstructured data, to gain a comprehensive understanding of the business landscape.

- Explore and implement predictive analytics to improve user targeting, product recommendations, and business forecasting.

- Collaborate with cross-functional teams to define key performance indicators (KPIs) and track performance metrics.

- Ensure data privacy and security compliance, implementing measures to safeguard sensitive information.

- Stay updated on the latest data science advancements and best practices, continuously enhancing your skills and knowledge.

Qualifications:

- Proven experience as a Data Science Specialist, with a focus on data analysis, machine learning, and predictive modeling.

- Strong knowledge of Python

- Strong knowledge of data manipulation, cleaning, and visualization techniques.

- Experience with machine learning libraries and frameworks (e.g., scikit-learn, TensorFlow, or PyTorch).

- Familiarity with database systems and querying languages (e.g., SQL).

- Ability to interpret and communicate complex data insights to both technical and non-technical stakeholders.

- Strong problem-solving skills and the ability to work independently as well as collaboratively in a remote team environment.

- Excellent communication skills and the ability to effectively convey complex technical concepts.

How to Apply:

Interested candidates are encouraged to submit their resume, portfolio, and any relevant work samples via the test questions link:
