**Описание вакансии**

Вимоги, побажання:

Solve.Care is seeking a Application developer/Engineer for Care.Network development and delivery. This role requires a strong development experience in python and JSON with high level understanding of modern applications.

**Responsibilities & Technical requirements.**

- As part of the network delivery team, your primary role would be to ensure Development, Validation and Support activities, to assure that our clients/community/users/partners are satisfied with the high levels of service in the technology domain.
- You will gather the requirements and specifications to understand the client requirements in a detailed manner and translate the same into system requirements.
- You will be developing application using JSON & Python software development stacks, ecosystems, frameworks, and tools such as Numpy, Scipy, Pandas.
- PySpark - basic familiarity (DataFrame operations, PySpark SQL functions) and differences with other DataFrame implementations (Pandas)
- You should have working experience on RestAPI and Postman (API testing tool)
- Demonstrated experience in the full system development life cycle: Analysis, Design, Programming, Testing, Implementation, and Maintenance.
- Proficient in Python scripting, JSON with previous experience handling large datasets in Python.
- Writing scalable code using Python programming language.
- Ability to translate functional / nonfunctional requirements to systems requirements.
- Ability to design and code complex programs.
- Ability to write test cases and scenarios based on the specifications and conduct end to end network testing.
- Good understanding of agile methodologies.
- Logical thinking and problem-solving skills along with an ability to collaborate

**Qualification:**

- Graduate (In Computer science).
- 5+ years of experience in Python and JSON development.

Kindly submit your resume/CV through the link below. Applications sent through other channels will not be considered for review.
