Описание вакансии

About us

Wildix is the first 100% secure, easy-to-use, professional web-based UC&C system, recognized as a Niche Player in the Gartner® Magic Quadrant™ for Unified Communications as a Service in 2021.

Founded in 2005 by two Italian brothers, Steve and Dimitri Osler, we are now among the fastest-growing companies in the UCaaS sector. Headquartered in Tallinn, Estonia, we have more than 250 staff members representing over 15 nationalities. Our team works across Europe, the UK, the Americas, and Ukraine, serving more than 135 countries through our partner ecosystem.

We created what we call the **Blue Ecosystem**: the way partners, end-users, the company, and our employees communicate with each other.

Our mission is to facilitate internal and external communication between companies and their customers worldwide, using web browsers and mobile applications, thereby increasing productivity and efficiency.

Who we are looking for

We are looking for a Manual QA Engineer (Web) to join our team. You will work on an innovative Real-Time Collaboration Platform including Audio / Video calls, Conferencing, and Chat as well as multiple other services.

Are you up for the challenge?

How You Will Make an Impact:

- Identifying and escalating issues, questions, and bugs as early as possible
- Planning, communicating with developers, and documenting expected testing activities and ways to implement tests in the system
- Providing manual and automated testing, debugging, and reporting on all test activities
- Designing and creating test documentation including test cases, checklists, test runs, test plans, and bug reports
- Preparing test environments and test stands
- Reproducing, troubleshooting, and assisting Support/other DEVs/QAs with issues
- Taking an active part in kanban meetings, using kanban/DevOps practices and techniques
- Using, analyzing, maintaining, and improving QA processes and practices, as well as implementing new practices that will optimize the delivery of work items on all stages

What You Bring to the Team

- 3+ years of experience in QA
- Understanding of test design techniques and types of testing
- Proficiency in Quality Assurance methodologies and processes
- Knowledge of HTTP protocol

- Have experience with API testing
- Understanding concepts of web applications (Front End, Back End)
- Linux knowledge (user / confident user)
- Intermediate level of English

Now, it would be fantastic if You

- Have experience with a programming language (TypeScript, JavaScript, PHP)
- Have experience with cloud solutions (AWS)
- Have experience with SQL
- Possess knowledge of network technologies. What OSI model is. How DNS, DHCP, etc work
- Worked with TestRail, JIRA
- Have a background in test automation with Playwright
- Have experience with Git

Why You'll Love it here:

- Be part of the fastest-growing, talent-focused company in Unified Communications
- Career growth opportunities
- Working hours (9:00-18:00 or 10:00-19:00)
- Paid vacations and sick leaves
- English courses with native speakers
- Coverage of costs for certification and IT conferences
- We care about your health and well-being, which is why we offer a healthcare insurance
- Possible remote collaboration

Happy with them? We offer even more! Our Benefits are country-specific, you can ask your recruiter for more information.

We are Wildix:

Wildix is an equal-opportunity employer. We value diversity and welcome all applicants regardless of race, gender, age, religion, or any other characteristic. Everyone is encouraged to apply and is welcome to join our Blue Ecosystem.
