Описание вакансии

DataCenter AI is looking for contributors to work on data annotation projects for training artificial intelligence systems.

We collaborate with international AI projects of varying complexity.

What you will do

• Annotate and label data according to project guidelines
• Work with images and other types of data
• Classify and review information
• Follow quality and deadline requirements.

Work format & compensation

• Remote work
• Flexible schedule
• **Pay rate - 100 UAH/hour for actual working time + overtime pay**
• Full-time availability or project-based involvement depending on workload
• Optional workload up to 12 hours per day
• Engagement depends on active project availability.

Who we are looking for

• Basic understanding of data annotation or completion of relevant courses
• Attention to detail
• Responsibility and self-organization
• Confident PC and online tool usage
• Willingness to learn and follow instructions.

What we offer

• Experience working on real AI projects
• Flexible collaboration format
• Opportunity for stable workload when projects are active
• Potential for long-term cooperation.
