Опис вакансії

DataArt is looking for an inquisitive person who's capable of quickly learning and mastering new technologies. Our stack is based mostly on container technologies.

If you:

Have experience working with Docker or common protocols such as CoreOS and Kubernetes

Have a genuine interest in virtualization and know that the «cloud» is not just an object in the sky

Enjoy creating new things and are capable of using any scripting language that can extend our technological stack and provide the necessary tools

Then we'd like to see you in our team!

Requirements:

Knowledge of Linux

Knowledge of cloud infrastructures and Shell Script bash is preferred

Any other scripting language Python is preferred

Experience working with Docker containers

CoreOS, etcd, fleet

Understanding of common web protocols: HTTP/S, DNS, SSL

Knowledge of AWS

Understanding of monitoring and its main objectives

Basic skills of working with network technologies

Additional Requirements:

Basic skills of Go language

Virtualization

OpenStack

Understanding of development processes

Knowledge of CI and CD
