Опис вакансії

Description:

We are looking for Senior level Developers with strong background in server-side development on diifferent technologies (PHP, Ruby, Python, .NET, Java, etc) and experience with JavaScript, who are interested in learning new and perspective technology node.js.

Our clients are leaders in the Quick Service Restaurant business in the USA. The project is a big heavy load, cross-platform system. It includes several subprojects like Point of Sale system, Back of House application, etc. The project team is about 50+ people for now and we continue to grow.

The main back-end technology on our project is node.js. We are ready to provide node.js training to Senior Developers from other technologies. We will have a training program from one of the leading trainers in Kharkov since the second part of October. The time for education will be billable for participants according to their usual rate. As a senior level developer you will have the possibility to participate in technical design and influence the architecture.

Required skills:

- 5+ years of back-end development experience
- Good understanding of JavaScript language principals
- Experience with REST API
- At least Intermediate English

Desired skills:

- Experience with WebSockets
- Design Patterns
- JavaScript Backend MVC Frameworks (Express, Koa, etc)
- OOP/OOD
- RDBM design
- JavaScript Frontend MVC Frameworks (Angular, Ember, Backbone, etc)
- ES2016
- React.js
- Experience with Node.js
