Опис вакансії

Project description:

We are looking for the Intermediate IT Specialist for our IT team which provides administrative support and configs infrastructure for developers and engineers from other teams.

You will deal with challenging tasks on several projects, which include the support and maintenance of a large number of servers located in different countries and on different continents.

Also you will have a possibility to communicate directly with our customers.

Role description:

- Maintain different critical IT environments (Linux/Windows)

- Analyse the bottlenecks and plan preparation to optimize/improve client`s services

- Work with Cloud Services

- Assist and supervise less experienced team members

- Communication with customers

Required skills:

- At least 2 years experience as a IT Specialist in IT company

- Fast, reliable and responsible

- Experience with high critical and high load IT environments

- Administration of Linux (Ubuntu) servers, Windows 2008/2012 environments with at least 10 servers

- Experience with scripting for Linux (Bash) and Windows (PowerShell)

- Good knowledge of network protocols and experience with enterprise network equipment

- Expert of troubleshooting

- English at least on Intermediate level (with ability to communicate with foreign customers)

Desired skills:

- Good knowledge of Apache/IIS web servers

- Knowledge of Cloud technologies (AWS, RackSpace, Azure services)

- Knowledge of autoconfiguration tools like Ansible

- Knowledge of Docker/Vagrant
