**Опис
вакансії**

We are looking for individuals who share a level of accountability and have a vision to improve blockchain accessibility. We care less about your location and industry area experience and more about purpose and motivation. You would come in on the ground floor of an extremely fast growing, strongly funded project!

The main responsibility is to design and build industry specific solutions using Blockchain technologies, contribute to infrastructure setup and solution development in Blockchain and related technologies such as Ethereum, cryptocurrencies and smart contracts.

You' ll be working on developing, designing, and testing blockchain technologies. You also may know how blockchain technologies can be used to grow and optimize our existing businesses.

Requirements:

- Must have strong object oriented programming language background, preferebly C++, Go or Python;
- Experience in working with Blockchain technologies;
- Ethereum Virtual Machine;
- Familiarity with using GIT;
- Unix / Linux advanced user;
- Understanding the nature of asynchronous programming;
- Good knowledge of design principles behind a scalable application;
- Architecture design skills;
- Experience with Smart Contracts development using Solidity;
- Knowledge of web servers, etc.;
- C1 level of English.

Advantages:

- Knowledge of information security: XSS, CSRF, VPN, SQL Injection;
- To be familiar with Agile Software Development (Scrum);
- Working knowledge of Docker;
- Knowledge of server - less architecture;
- Understanding of Algorithms and Data Structures;
- Able to learn complex technologies quickly;
- Certificates OWASP, CEH, OSCP.

Industry: Cryptocurrency, Blockchain Development
