Опис вакансії

As a **Back-End Developer**, you will be developing complex database schemes and will be part of a cutting-edge development team.

Key Responsibilities

- Understand the dynamics of object-oriented programming language (OOP)
- Efficiency in developing complex database schemes
- Integration of user-facing elements developed by front-end developers
- Build efficient, testable, and reusable PHP modules
- Solve complex performance problems and architectural challenges
- Develop within framework requirements

Key Requirements

- At least 3 years relevant work experience
- University / College degree in Computer Science or equivalent
- Solid knowledge of PHP, JavaScript and Node.JS
- Knowledge of modern frameworks eg Laravel
- Intuitive, creative and problem solver
- Excellent analytical and multitasking skills
- Ability to work under pressure in a fast-paced environment

Remuneration & Benefits

- Excellent remuneration package based on experience & skills
- Interesting and challenging projects
