📍 Дніпро,

Компанія: ABC Hosting

Рубрики: IT, WEB фахівці

Побажання до співробітника

Освіта:	не має значення
Досвід роботи:	не вимагається
Графік роботи:	віддалена робота

Опис вакансії

ABC Hosting Ltd. is a company offering hosting services in several languages aimed at regions like Ukraine, Venezuela, Uganda, Nigeria, Poland and United Arab Emirates. We're currently expanding our services to other countries around the world. Recently, we decided to introduce a new cryptocurrency project creating a new way to gain profit from websites traffic. We don't have physical offices, therefore we're only offering remote positions.

This is a remote job with a full-time schedule.

Main duties & responsibilities:
Add new and improve existing functionalities on the users control panel of our hosting.
Participate in the development of our new cryptocurrency project.

Cowork with our system administrators and testers department.
Track your work in Redmine and use Git as VCS

Position Requirements:

PHP 7 and PSRs (we use PHP 7.2 and PHP 7.1).

Knowledge and practical usage of OOP and its basic principles (awareness of GRASP, SOLID and design patterns is a plus).

Experience with at least one MVC-oriented Framework (Yii2, Laravel, Symfony, Zend).

MySQL or compatible DBMS experience.

Ability to work with PHP's PDO lib (or at least mysqli). Experience with Doctrine is a plus.

Basic JavaScript skills (knowledge of jQuery and Vue.js).

Experience with some VCS (preferably Git) is strongly desired.

Bootstrap skills

Ability to write codes that are clean and understable, following consistent code styles.

Proactiveness is desired.

English Upper Level - sufficient skills for written communication

Optional skills:

Experience in integrating 3rd party or internal services (via AJAX, JSON-RPC or maybe SOAP)

SASS skills

Experience with PHPUnit testing framework (It's not limitative, but you will have to learn it)

Being familiar with Linux (Bash) console shell and have experience with SSH connections

Ability to write simple Python / Bash scripts

Knowledge of phpBB

CI/CD platforms (Gitlab)

Knowledge of RabbitMQ, Node.js and ReactPHP

What do we offer?

Salary according to skills and experience

Friendly multicultural work environment

The chance to further develop your IT knowledge

Salary increases and bonuses depending on your performance and the outcome of your projects.

We use Redmine for project management and Rocket.Chat+ for everyday communication.

If you are interested, please send your CV to us and add your salary expectations for this position and your Skype username. We will directly contact you for a text-based interview.
