Графік роботи: віддалена робота

Опис вакансії

We are looking for a highly skilled SW Engineer to join our growing Apostera team helping us to develop state of the art mixed reality applications for automotive solutions including UI/UX part and business logic. The ideal candidate will have prior experience with similar SW for real-time system designing it in the way to get well-structured, easily-readable and highly-stable source code. The great plus is prior experience in 2D/3D real-time graphic rendering techniques and GPU rendering pipeline.

Key Competencies:

- Drive for Results
- Team-work and cooperation
- Problem solving and decision making
- Ability to deal with ambiguity

Skills Required:

- 3+ years of engineering experience
- Strong Computer Science fundamentals (data-structures, algorithms, etc.).
- Strong Object-Oriented Programming and Design knowledge (e.g. design patterns)
- Strong C++11 and STL knowledge
- Good linear algebra knowledge
- MS or BS in Computer Science or Applied Mathematics.
- Intermediate English

Будет плюсом

- Experience with Linux OS
- Debugging under Linux
- Boost knowledge
- Experience with multithreading
- Understanding of dynamic libraries
- Experience with OpenGL ES 3.x and GLSL ES

Обязанности

- Software development for ADAS and infotainment systems and solutions
- Implementation of UI/UX design according to customer requirements
- Verification of implemented software (unit test, etc.)
- Optimization of existing algorithms to achieve real-time performance under target platform
- Involvement to requirements analysis, architecture development, design
- Review of software requirements, architecture and design documents and implementation
- Following of the processes specific to automotive industry and software development in general
- Communication with customer (optional).
