Опис вакансії

Requirements:

The team needs a full-time frontend engineer with 3+ years of experience working in agile teams on medium to large-scale SaaS applications. A great team player who is passionate about clean code, elegant software architecture, and breathtaking UI UX. Goal-oriented and a crazy-fast learner.

- Scss, Styled-components, React, TypeScript
- State management: Redux, Context-api
- Bundling: Webpack
- Linters/code stylers: ESLint, Prettier
- Testing tools: Jest, React testing library/enzyme
- Intermediate English (conversational)
- Understanding and experience with Scrum/Agile methodologies
- Experience working in small/medium-sized teams
- Git, git-flow/one-flow
- Design patterns, OOP/functional principles

Responsibility:

- Contribute ideas through your knowledge of evolving front-end technologies
- Be proactive in communication with team members and client
- Use industry best practices of development processes & tools, adopt and improve them
- Create and maintain modern interfaces according to unit standards
- Code Quality. Follow and improve code quality standards
- Analyze and Estimate. Perform technical assessment of UI mockups/wireframes to ensure the possibility of their implementation within reasonable time

The client is a Silicon Valley/UC Berkeley based startup focused on building cross-platform (desktop, tablet, and mobile) enterprise software for the Cleantech industry. With secured angel and seed investments, a methodically validated idea, and 2 LOIs from enterprise clients (50+ users each). Our software development team counts 6 software developers with a great mix of frontend, backend and UX talent.

If you're interested, please forward your resume to a.kolesnik@dnpteam.com — we are looking forward to hearing from you!
