Опис вакансії

We are currently looking for the QA Engineer. You will be involved in a highly professional teamy. As a QA Engineer, you will live on the front lines of the products we create, and build features used by millions of people every day.

Requirements:

- 1+year of experience in web;
- Hands-on experience with web development tools (FireBug, Web developer console);
- Experience in test cases/checklist creation & maintenance, API testing;
- Knowledge of QA processes;
- Basic knowledge in SQL (simple select queries);
- Experience with Postman;
- Working experience with Scrum methodology.

Project — is a huge internal system for one of the largest automotive industry in the world. The main purpose of the system is the communication of employees and dealer network management. The system includes over 50 modules. This is project is written by Yii2 on the back-end side and Vue on the Front-end side. The product has a lot of integration with different APIs. However, our project has a large number of sub-modules, it is well-documented. Our task is to develop the system and new modules.

Responsibilities:

- Preparation and execution of test plans and test cases;
- Manual testing of web and mobile applications;
- Maintaining test plan, use cases and test cases;
- Communication with client and developers;
- Report issues in the bug tracking system;
- Quality Control and Test Design for a rapidly evolving web application;
- Requirements and Documentation testing;
- Estimation of Testing efforts;
- Identification and proposal of areas of improvement for the QC process.

We offer:

- Ability to work on interesting and complex projects;
- Opportunity for self-improvement and professional growth;
- Competitive salary according to qualification;
- Comfortable office location;
- Regular (twice a year) performance reviews;
- Healthcare insurance;
- Paid vacation and sick leave.

Про компанію:

SECL Group UkraineThe company "SECL Group Ukraine" was founded in 2005. We are engaged in web development and web design. The main specialization is e-commerce and social services. At the moment, more than half of our portfolio are online stores and marketplaces, the second half is services and portals. Our clients include startups, commercial and government companies, including large international structures. Our distinctive feature is that we are thinking developers, we do not just write code and draw pictures, we solve your problems. It is thanks to the approach and specialization that 90% of our clients turn to us.
