Опис вакансії

Вимоги, побажання:

Requirements:

- Has experience with C++ plugin development for Unity or Unreal and a good understanding of the considerations for key platforms (iOS/mac, Android, Windows);
- Has worked with the guts of media player technologies such as exoplayer, AVFoundation, WMF or has experience in similar technologies at a similar low level (e.g. writing Vulkan renderers). This aptitude is the strongest requirement for the work.

Responsibilities:

- The core work to be done is to extend or replace existing custom video players for Unity and Unreal to support a synchronization signal driven from another media stream or a timecode. This is to be used to synchronize multiple audio and video streams which may be loaded from different media container files at different times.

We offer:

Competitive salary;
Paid 24-day vacation;
Sick leave compensation;
Flexible working hours;
Team buildings;
Performance reviews with possible salary raises.

Есть тестовое задание.
